

Assignment Brief: Digital Systems, Interoperability, and Emerging Technologies in Modern Aged Care

Course/Module: Digital System

Assessment Weight: 100 Marks (100% of Assignment Grade)

Format: ShortEssay/Critical Responses

Expected Length: 300–450 words per question (3,000–4,500 words total)

Instructions to Students

This assignment requires you to critically evaluate contemporary frameworks in institutional care, ethics, law, and quality improvement. While these themes may have been introduced in course webinars, **every response must be grounded in independent external research.**

You must cite external literature, legal statutes, sociological concepts, or comparative international frameworks as specified in each prompt. Ensure all sources are correctly cited using the required academic referencing style (e.g., APA 7th Edition).

Question 1:

How do the upcoming updates to the My Aged Care system help clients monitor their own progress and search for providers with verified specializations

Question 2:

In what ways does the Business-to-Government (B2G) developer gateway (responding to Royal Commission Recommendation 109) reduce manual administrative tasks for aged care staff

Question 3:

Under the Services Australia rules implemented on June 26, 2026, what simplified process must providers follow when submitting late invoice claims

Question 4:

What is the purpose of Australia's new "Oz Alert" emergency warning system, and how do its tailored stakeholder kits support diverse and vulnerable aged care residents

Question 5:

Why is the Department of Health, Disability and Ageing introducing Stage 3 DEX (Data Exchange) reporting changes for the Commonwealth Home Support Programme (CHSP) on August 11

Question 6:

How does the newly published CHSP DEX Guide assist community care providers in reporting differing client fee contributions

Question 7:

According to the Therapeutic Goods Administration (TGA), what is the primary difference between unregulated wellness software and software regulated as a medical device

Question 8:

Under what specific conditions does a digital transcription scribe cross the line from a simple administrative tool to a regulated medical device

:

Question 9:

According to the department's "learning bite" segment, what is the core operational difference between a rules-based algorithm and an adaptive artificial intelligence (AI) system

Question 10:

Why is it clinically risky to use an artificial intelligence tool in elder care if the AI was trained on data that does not represent the specific aged care population

Marking Scheme & Grading Rubric (100 Marks Total)

Each of the 10 questions is worth **10 marks**, assessed against the following criteria:

High Distinction	9 - 10	Exceptional synthesis of external research. Argument is highly critical, nuanced, and perfectly directly addresses all parts of the prompt. Flawless referencing.
Distinction	7.5 - 8.5	Strong integration of external concepts. Solid analysis with clear logical flow. Minor gaps in depth or minor formatting issues.
Credit	6 - 7	Adequate research, though relies on basic definitions. Analysis is present but lacks critical depth or systemic insight. Competent writing and referencing.
Pass	5 - 5.5	Barely addresses the prompt. Heavy reliance on course materials rather than independent external research. Descriptive rather than analytical.
Fail	0 - 4.5	Fails to answer the prompt. Missing external research entirely. Poorly structured, lacking citations, or demonstrating fundamental misunderstandings of the topic.
